DETECTION

5 LESSONS

PHASE 5 • DEFENSE, DETECTION & RESPONSE

Endpoint Detection & Response (EDR/XDR)

Telemetry, behavioral analysis, hunting, response automation, and the detection-engineering craft of modern endpoint platforms.

01

EDR vs Antivirus: The Modern Endpoint

INTERMEDIATE

CONCEPT

35 min →

From signature AV to continuous telemetry-and-response – and what mak...

02

Telemetry Sources: OS Events, Sysmon, Endpoint Data

INTERMEDIATE

LAB

45 min →

Sysmon EventIDs, Windows event log families, Linux auditd – the raw s...

03

Behavioral Detection & Alert Rules

ADVANCED

LAB

50 min →

The rule-writing craft: Sigma for EDR/SIEM, parent-child patterns, LO...

04

Threat Hunting: Hypothesis-Driven Analysis

ADVANCED

LAB

50 min →

The hunter's workflow: hypothesis → collect → analyze → document, wit...

05

Automated Response & SOAR

ADVANCED

CONCEPT

40 min →

Playbooks, automation triggers, containment actions, and the human-vs...
