NETDEF

6 LESSONS

PHASE 5 • DEFENSE, DETECTION & RESPONSE

Network Security & Perimeter Defense

Firewalls, IDS/IPS, WAF, proxies, segmentation, VPN/ZTNA and network monitoring – the walls and windows of enterprise defense.

01

Firewalls: Packet, Stateful, NGFW

INTERMEDIATE

LAB

45 min →

From stateless ACLs to identity-aware NGFW policies – with pfSense-st...

02

IDS/IPS: Suricata, Rules, Deployments

INTERMEDIATE

LAB

50 min →

Network-based and host-based detection, Suricata/Snort rules, IPS inl...

03

WAF, Reverse Proxies & Content Filters

INTERMEDIATE

LAB

45 min →

ModSecurity, TLS termination, caching, URL rewriting – protections si...

04

Segmentation, VPN & ZTNA

INTERMEDIATE

LAB

45 min →

Islands instead of a sea: micro-segmentation, VPN flavors, beyond-VPN...

05

Network Monitoring, NetFlow & Packet Analysis

INTERMEDIATE

LAB

45 min →

Flow records, PCAP triage, baselining, and the detection patterns (be...

06

Perimeter Defense Craft: The Full Stack

ADVANCED

LAB

50 min →

Assemble the defense-in-depth perimeter: DNS security, email gateway,...
