PHASE 7 • ADVANCED

AI, Machine Learning & Emerging Cyber Threats

The threat frontier: AI-powered malware, autonomous attack chains, quantum computing implications, and how defenders harness the same tools – an honest, evolving, professional overview.

01

The AI Threat Landscape: What's Real vs Hype

INTERMEDIATE

CONCEPT

40 min →

Separating science fiction from near-term reality: what AI already do...

02

Deepfakes, Voice Cloning & AI Social Engineering

INTERMEDIATE

CONCEPT

40 min →

When seeing is not believing: voice/video clone attacks, phishing at ...

03

AI-Powered Malware & Evasion

INTERMEDIATE

CONCEPT

40 min →

Polymorphism, LLM-driven evasion, sandbox detection, and why AI might...

04

Quantum Computing & Cryptographic Risk

INTERMEDIATE

CONCEPT

40 min →

Factoring large numbers got a real machine; RSA/ECC are on the clock...

05

Using AI for Defense: UEBA, SOAR, Anomaly

INTERMEDIATE

LAB

40 min →

The good side: ML-driven UEBA, anomaly detection in networks/endpoint...

06

The Future & Your Professional Path

INTERMEDIATE

CONCEPT

35 min →

Where the field is heading, the evolving role of the security practit...

← Reverse Engineering & Exploit...
